Professor Joshua Lederberg
Department of Genetics
Stanford University Medical School
Palo Alto, California 94305

Dear Professor Lederberg:

I read with interest your column in the August 17th Washington Post discussing the potential problems in biological warfare.

I was interested in your discussion of the problems in this area in your prepared statement before the Subcommittee holding hearings on S.J. Resolution 145.

You mentioned in your article the United Nations, the British delegation, and limited U.S. State Department efforts. I'm wondering if you can suggest to me where specifically I might write to obtain further information about current efforts in this field.

With warmest regards.

Sincerely,

Walter F. Mondale
